

# Coffee Sales Dashboard

Microsoft Excel | Sales Analysis | Interactive Dashboard

# Project Overview

## Objective

- Analyze coffee sales data
- Build an interactive Excel dashboard
- Generate meaningful business insights

## Dataset

### Orders

Transaction records

### Customers

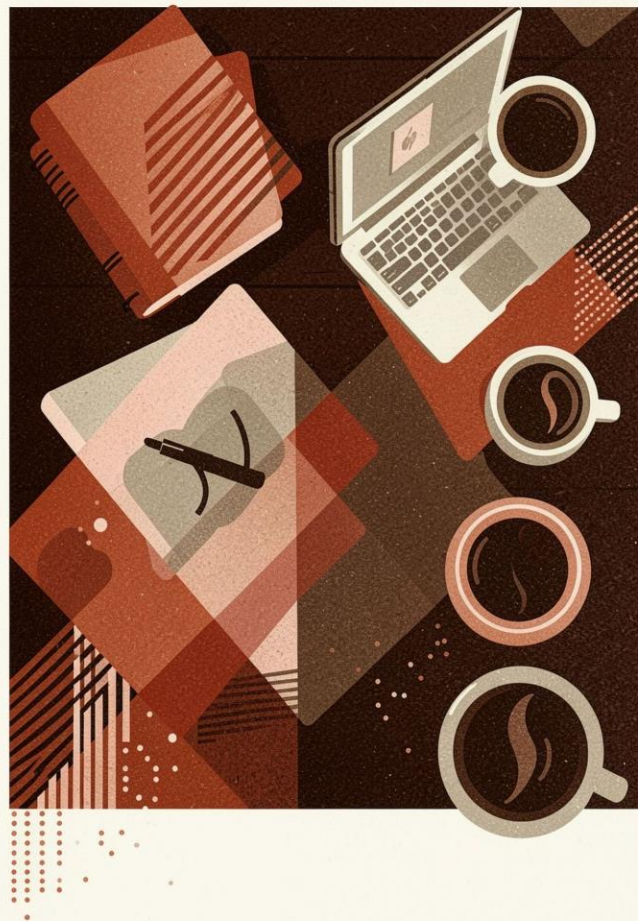

Customer information

### Products

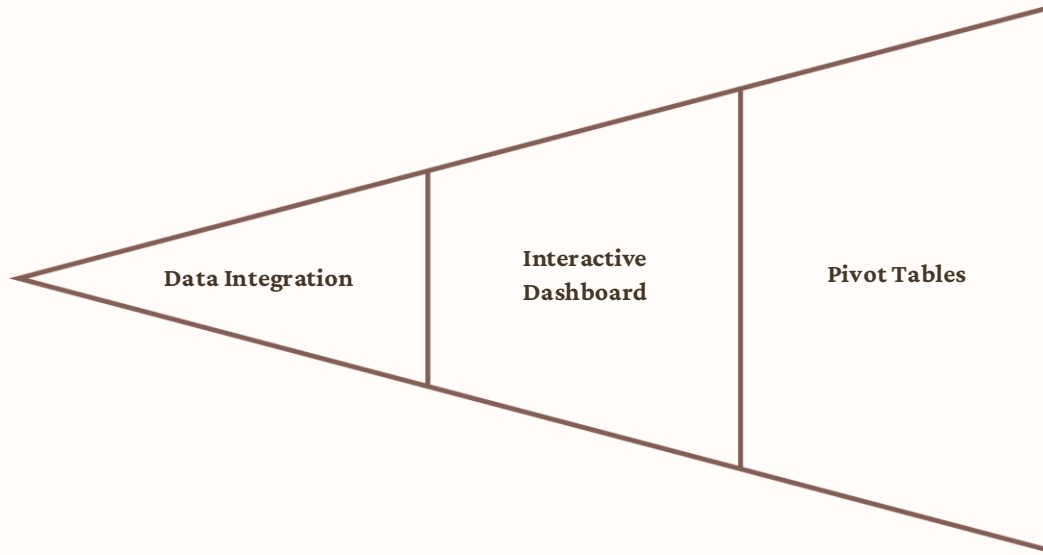

Coffee varieties

### 1,000 Records

Complete dataset

# Workflow & Excel Tools

## Excel Tools Used

### **XLOOKUP**

Data matching across tables

### **IF Function**

Conditional logic

### **Pivot Tables & Charts**

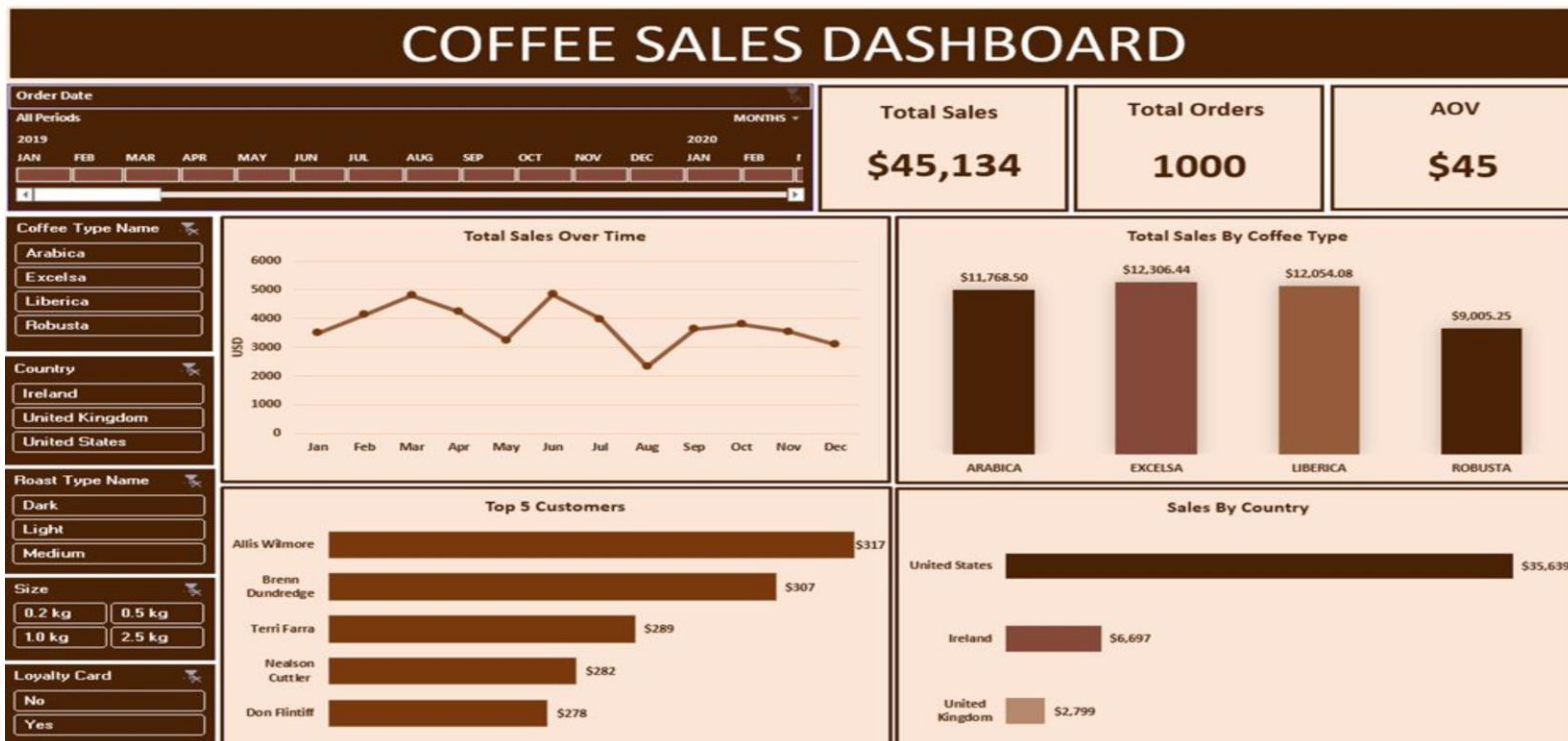

Aggregation & visualization

### **Slicers & Timeline**

Interactive filtering

# Interactive Coffee Sales Dashboard

# Key Insights

## Product Performance

**Top Seller:** Excelsa (27.27%)

## Market Performance

**Top Market:** USA (78.96%)

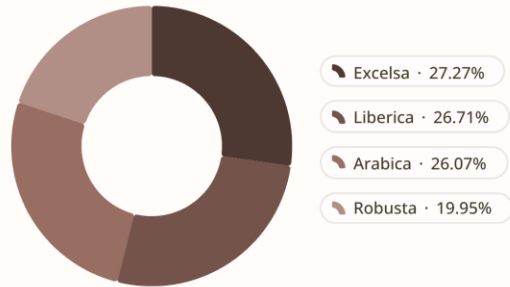

## Sales Distribution

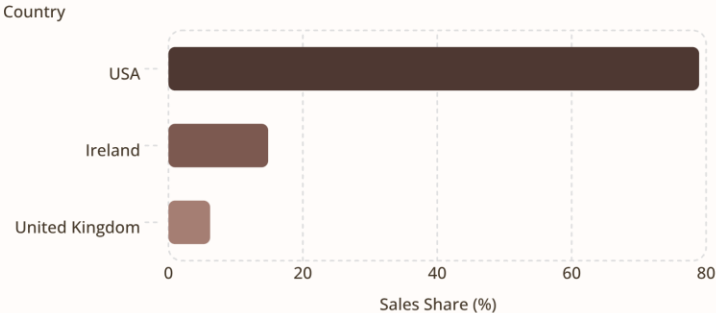

Coffee sales are **well balanced** across all four varieties.

**Key Takeaway** — The business relies heavily on the USA market, while coffee product sales remain relatively balanced across varieties, indicating opportunities for international growth.

## Coffee Type Contribution

## Top Markets by Sales

# Dashboard Business Value

## Monitor Sales Performance

Track revenue trends in real-time to stay on top of business health

## Compare Coffee Products

Analyze product-wise profitability to optimize the menu mix

## Identify Top Customers

Focus retention and marketing efforts on high-value accounts

## Geographic Market Intelligence

Understand country-wise sales distribution for expansion planning

## Track Monthly Trends

Spot seasonal patterns and adjust inventory or promotions accordingly

## Support Data-Driven Decisions

Enable strategic planning backed by clear, actionable insights

# Skills Gained

## Technical Skills

**Microsoft Excel**

**XLOOKUP**

**Pivot Tables**

**Pivot Charts**

**Dashboard Design**

**Data Visualization**

## Analytical Skills

### **Data Integration**

Merging multiple data sources seamlessly

### **Sales & Trend Analysis**

Identifying performance patterns over time

### **Customer Analysis**

Profiling and segmenting high-value accounts

### **Business Reporting & Insights**

Translating data into strategic recommendations
